Testimonial

"We have been using Glacier Ridge Computing (GRC) for approximately three years and have been very satisfied. We tried two other computer maintenance companies previously but were not satisfied. GRC gives us good service, their representatives have been knowledgeable, and their pricing has been fair."

-Dave Bohmer, President/CEO
Bonanza Valley State Bank
Broton, MN

Our Mission

To provide an unmatched level of service on a personal and technical level at an affordable cost to the customer.

**Cutting Edge Technology
with Small Town Friendliness**

Glacier Ridge Computing is based in Glenwood, MN and is dedicated to serving businesses and residents with unique technology needs. With over 20 years of combined experience we are able to meet a wide variety of needs, providing our clients with one place to meet all of their technology demands.

Our experience is extensive, ranging from virus clean-up to database design to setting up and monitoring networks. We have business skills in financial companies, distribution manufacturing, banking, insurance and health care environments to provide application solutions as well as general support services. Our staff can perform at all levels, from initial requirements definition, designers, project managers, programmers, testers, developing interfaces, and conducting end user training. For support services you can depend on us for assistance with one computer or a fully-integrated network.

Whether you are looking for a solution for your home or business, we are here to help.

Computing Services

Our technicians are experts in the technology industry. We are able to diagnose issues with either business or home computers and fix them rapidly. We have the fastest turn-around in the area. We understand that there is not a lot of extra time for extra errands. For your convenience we offer in-home or on-site service for equipment installation or repair.

We assist our clients with a wide range of knowledge and skills in order to keep your computers, printers and networks running efficiently. We take preventive measures with your equipment to ensure your systems are dependable, but when struck with a virus or other hardware or software issue you can count on us to get your systems running again quickly.

When the time comes for you to replace your computers, printers or other essential devices we offer competitively priced equipment to meet your needs. Equipment purchased from Glacier Ridge Computing is custom built in our office. We will work with you to determine your needs and build your computer to fit the demands of your household or business.

Business Services

Glacier Ridge Computing is able to help with any technology need in business. Our consultants offer strong business, application development and project management skills; including system analysis and design, database design, and task specifications. We also possess strong technical programming, testing, and implementation skills. We are dedicated to completing your assignment as quickly and proficiently as possible.

We have extensive experience with network and system installation and support. Monitoring your network and servers is important for the health and productivity of your office. We ensure your systems are running smoothly so your employees are able to maximize their productivity at work. We are able to set up leading edge technologies, such as Virtual Private Network, so your employees are able to work remotely. Look to us to assist your business with implementing a new network, servers, relocating your office or networking your locations together.

Your web presence is important to the success of your business. We offer design and hosting services to ensure your company has a strong global presence.
